

## **NORMECA Field Hospitals**

*Semi-permanent scalable mobile hospitals in Sudan*

Semi-permanent hospitals have been fabricated, installed, and maintained through an ongoing contract with the Government of Southern Sudan to improve health care services available. The contract specified 10 semi-permanent hospitals in Southern Sudan, each with 80 to 150 beds, to house a total of approximately 1,000 people, with an additional 50 mobile clinics. These hospitals have an expected life cycle of about 20 to 30 years.

The hospital units are prefabricated and delivered under a short time frame. The first hospital unit was constructed of 162 containers, each weighing 2000 kilograms and provided all staff, maintenance, security and other supplies, such as catering and accommodations for staff. Infrastructure was also provided, including drilling wells for a clean water supply and construction of sewage tanks.

Brondolo Associates can provide immediate information on these mobile hospitals and other services following a disaster. Please contact Tom Brondolo at 917-828-5980 for information.
